

ANSELM JOSEPH

FULL STACK DEVELOPER

+1 (872) 258-5803 • a joseph17@hawk.iit.edu • linkedin.com/in/anselmj • an231m.github.io

Creative Full Stack Developer with 6 years of experience in backend, web, and mobile applications. Master's in Computer Engineering with focus on Machine Learning. Experienced with React, React Native, Java, Node.js, MySQL, and MongoDB.

EDUCATION

ILLINOIS INSTITUTE OF TECHNOLOGY

MASTERS IN COMPUTER ENGINEERING, 3.9 GPA

- **Focus:** Probability & Statistics in CS, Machine Learning, and Artificial Intelligence.

CHICAGO, IL
EXPECTED MAY 2024

NEW HORIZON COLLEGE OF ENGINEERING

BACHELORS IN COMPUTER SCIENCE AND ENGINEERING

- **Focus:** Advanced Data Structures and Algorithms.

BANGALORE, INDIA
AUGUST 2013 – MAY 2017

SKILLS

Languages: JavaScript, TypeScript, Python, Java, Swift, Kotlin, Go.

Frontend Technologies: React, React Native, Angular, SwiftUI, HTML, CSS, Tailwind CSS, Bootstrap.

Backend Technologies: Google Cloud, Firebase, AWS Cloud, Node.js, Next.js, Spring Boot, Flask, MongoDB, Firestore, MySQL, Redis, Kafka, Docker.

Concepts: Operating System, Object Oriented Programming, Functional Programming, Caching, Encryption, Decryption, Artificial Intelligence, Machine Learning, Neural Networks, REST API, SOAP API, Database Normalization, Agile Methodology, Cloud Computing, Payment Systems, Containerization, CI/CD, Sockets, Networking, Security.

PROFESSIONAL EXPERIENCE

DOGLEADS

FOUNDING ENGINEER

- Conducted user interviews to understand market fit and developed a product roadmap, increasing interest in the product.
- Designed and built a creative pre-release landing page (<https://dogleads.pro>) to gauge user interest and collect emails using React, Next.js, Vercel, SendGrid. Resulting in 1000+ signups.
- Developed a map based interface with natural language input (NLP) to find leads by collating information extracted from mapping imagery using Next.js, React, Vercel, Mapbox.
- Created a Customer Relationship Management (CRM) system to manage leads and track interactions.

SAN FRANCISCO, CA
AUG 2023 – CURRENT

MOLEX

SOFTWARE ENGINEER

- Owned Identity and Access Management (IAM) microservice built using Java, Spring Boot, and MongoDB, streamlined user authentication and authorization processes, reducing API development time by 10% and enhancing security.
- Developed middleware to aggregate real-time data using Python, Kafka, AWS; improving ingestion rate by 17%.
- Initiated push to improve code quality by implementing test driven development (TDD), code reviews, and static code analysis using JaCoCo, SonarQube, and JUnit, reducing QA testing time by 50%.
- Improved digitization pipeline's efficiency by 70% for terabytes of blueprints built on GCP, Python, Pillow, and Solr.

BANGALORE, INDIA
DEC 2019 – AUG 2022

CBREX TECHNOLOGIES

PRODUCT ENGINEER 1

- Refactored website to use Java, Spring Boot, React and Bootstrap to improve UX, increasing user engagement by 33%.
- Created 2 JavaScript libraries, reducing redundant code by 20% and improving UX and customer satisfaction.
- Communicated technical subjects to stakeholders and created actionable tasks, reducing delivery time of features.
- Contributed to adoption of Agile Methodologies and CI/CD, utilizing Jira and Jenkins, improving productivity by 30%.
- Optimized MySQL queries and implemented API caching using Redis with Spring Boot, reducing load times by 44%.

BANGALORE, INDIA
AUG 2017 – DEC 2019

PROJECTS

NOBIAS INVESTING – React Native, Typescript, Swift, Java, GitLab CI/CD

- Balanced between UX and performance on information-rich screens through a process of continuous improvement.
- Widespread device compatibility was prioritized and ensured reliability and responsiveness on low-end networks.

EARTHEN SHADE – React.js, Next.js, Vercel, Firebase, GCP, Typescript, Tailwind CSS

- Designed and developed an e-commerce platform, finding balance between technical robustness and business impact, iterating with feedback from stakeholders and customers.
- Implemented a real-time chat feature using WebSocket and Socket.io, enhancing user engagement and reducing response time by 20%.

DIGITAL LIFE CERTIFICATE – HTML, JavaScript, Tailwind CSS, Python, Docker

- Implemented secure facial recognition and liveness detection and generated identifiable and tamper proof PDF documents.
- Ensured highly secure, testable, and well documented code with 100% code coverage that passed security audits by 2 independent security agencies.
